Institute of New Structural Economics
at Peking University

Annual Report

2017
Founded in December 2015, the Center for New Structural Economics at Peking University (CNSE) was officially upgraded to an institute, i.e. the Institute of New Structural Economics at Peking University (INSE), in December 2017. The INSE is committed to indigenous theoretical innovations based on the development experiences of China and other developing countries and strives to become a leading academic research centre on international development and a world-class flagship think tank.

To deepen the research, application, and extension of New Structural Economics, the INSE works rhythmically on areas including fundamental academic research, talent cultivation, team development, database construction, think-tank practices and academic exchange. The INSE is devoted to helping young scholars, students, government officials, and industrial titans in China and other developing countries who want to contribute to the economic development of their own nation. The INSE helps these individuals to acquire the theoretical and practical mastery of New Structural Economics, while at the same time untangling their minds from the constraints of mainstream development theories based on prerequisites and those experiences of western countries, and to instead explore a tailored promising path for the modernization of their own country.

Advocating the academic code that “knowing and achieving being one”, New Structural Economics (NSE) emphasizes the combination of theoretical innovation with practical results. New Structural Economics opposes the notion that theory serves solely as a critical weapon, and instead upholds that “a good theory is the one that truly helps people understand the world and to build a better world”.

The core value and research perspective of New Structural Economics coincide with what President Xi Jinping advocated for and addressed at the UN General Assembly on September 26th, 2015 and at the UN High-Level Roundtable on the South-South Cooperation that, “Countries should formulate national development strategies according to their own endowments” and “Each country should give play to their own comparative advantages”. The purpose of the INSE reflects exactly President Xi’s announcement that “China would establish a knowledge center for international development and join hands with other countries to research and exchange ideas on development theories and practices tailored for their respective national conditions”.

The INSE takes on academic research as its cornerstone and think-tank practices as its pivot, and advocates a team culture featuring “professionalism, partnership, people, pace, passion, and publication”. The INSE comes up with research on critical issues regarding development strategies, institutions, policies, and fundamental theories based on developing countries’ practices in economic development and transformation. The INSE serves to explore and discover the general rules for international development with its comprehensive expertise, global top talents, and policy advisory, while integrating theory and practice so as to make contributions to the improvement of knowledge and welfare of the mankind, the rejuvenation of Chinese nation, and the enhancement of China’s cultural soft power.
Words from the Dean

In 2017, the Center for New Structural Economics, with the support of Peking University, had developed and upgraded into what is now known as the Institute of New Structural Economics (INSE).

Advocating the norm of “Actual achievements justify the true knowledge”, the academic code of “Knowing and achieving being one” and the development model of “Small Institute, Big Network”, the INSE has been devoted to inspire and facilitate the exchange of ideas and thoughts and pioneer its way to practical success through unremitting efforts.

This annual report records the footsteps of the young institute. In terms of theoretical innovation and extension, the INSE has made great headway in academic studies, talent development, and international exchanges. The INSE has provided not only the intellectual and policy support that has facilitated domestic local economic restructuring and upgrading but also guided other developing countries into exploring the modernization of roads suitable for their own conditions. The cooperation network of the INSE has expanded both domestically and internationally. As sub-centers of the INSE are making their way into many Chinese universities, the INSE aspires to be an influential think-tank with a global vision that is bolstered by the Global Research Consortium for Economic Structural Transformation (GReCEST).

The aim of theories is to understand the world and reshape the status quo. Theories feasible for one country may not be feasible for another. The intelligentsia form developing countries should get to the bottom of the structures and conditions of their nations in order to propose their own lines rather than copy the Western theories indiscriminately.

The establishment of CNSE/INSE creates the opportunity for a new trail in China’s philosophy and social sciences. The INSE expects more students to join in indigenous theoretical innovation and make their due contributions to the great rejuvenation of the Chinese nation and to the development and prosperity of other developing countries.

Professor Justin Yifu Lin
Dean, Institute of New Structural Economics
at Peking University

## 03 Think Tank Practices

### Domestic Projects

- Jilin Province: Research on Jilin’s Economic Structural Transformation and Upgrading
- Tibet: Research on the Development of Tibetan Characteristic Industries
- Guangzhou City: Supporting the Landing of B&R Landmark Projects
- Zhongshan City: Research on Industrial Transformation and Upgrading Research
- Henan Province: Strategic Cooperative Research on Municipal Economic Restructuring and Upgrading

### International Projects

- Supporting Economic Transformation - Survey of Chinese Manufacturing Firms
- Nigeria: Building Special Economic Zones to Drive Structural Transformation: From the Perspective of NSE

## 06 Concluding Remarks
Our Team
Justin Yifu LIN  Dean of Institute of New Structural Economics at Peking University

Justin Yifu Lin is a Professor of Economics, Dean of the Institute of New Structural Economics, Dean of Institute of South-South Cooperation and Development and Honorary Dean of National School of Development at Peking University. He was the Senior Vice President and Chief Economist of the World Bank, 2008-2012. Prior to this, Prof. Lin served as Founding Director and Professor of the China Centre for Economic Research (CCER) at Peking University for 15 years since 1994. He obtained Ph.D. in Economics from University of Chicago in 1986. He is the author of more than thirty books including Beat the Odds: Jump-starting Developing Countries, Against the Consensus: Reflections on the Great Recession, The Quest for Prosperity: How Developing Economies Can Take Off, Demystifying the Chinese Economy, and New Structural Economics: A Framework for Rethinking Development and Policy, etc. He is a councilor of the State Council, a member of the Standing Committee, Chinese People’s Political Consultation Conference (CPPCC) and Vice Chairman of CPPCC Economic Committee. He is a Corresponding Fellow of the British Academy and a Fellow of the Academy of Sciences for Developing World.

Jiajun XU  Executive Deputy Dean & Assistant Professor

Jiajun Xu is an Assistant Professor and the Executive Deputy Dean of the Institute of New Structural Economics at Peking University. Xu worked in the United Nations and World Bank and currently acts as the General Secretary of the Global Research Consortium on Economic Structural Transformation (GReCEST). Her research focuses on development financing, industrial parks and global economic governance. She has published in top academic journals in the field of international development such as Journal of International Development and Institute of Development Studies Bulletin. She is the guest editor of China Economic Review and the lead author of Global Development Financing Report (2015). Her academic monograph Beyond US Hegemony in International Development was published by Cambridge University Press in 2017. She has led several policy-oriented development projects aimed at leveraging special economic zones to achieve structural transformation in developing countries such as Benin, Djibouti and Nigeria. Xu holds a DPhil (PhD) from the University of Oxford.

Yong WANG  Academic Deputy Dean, Associate Professor & Ph.D. Advisor

Yong Wang is an Associate Professor of Economics and Academic Deputy Dean of the Institute of New Structural Economics at Peking University. He obtained a Ph.D. from University of Chicago, where he won the Martin and Margaret Lee Prize in Price Theory. His research fields are Growth and Development, Macroeconomics, Political Economy, China and India Economies. His recent research topics include structural change, industry dynamics, industrial policies, China’s state capitalism, and middle-income trap. He was a resident research fellow at the World Bank (2010-2011). He publishes papers on Journal of Development Economics, Journal of Monetary Economics, etc. and also serves as a guest editor for China Economic Review. He is the author of several books including Thinking and Debates on New Structural Economics (Peking University Press). Yong was frequently invited to present his research at policy institutions including IMF, World Bank, Asian Development Bank, US Department of State, US Department of Treasury, Federal Reserve Bank, People's Bank of China, and Korean Institute of Finance.

Jianye YAN  Associate Professor

Jianye Yan received a Ph.D. degree from Toulouse School of Economics. His research interests include mechanism and market design, industrial economics, incentive regulation theory, behavioral economics, and Chinese economy. He has published academic articles in American Economic Journal: Microeconomics, Journal of Public Economics, Economic Inquiry, Energy Economics, Economics Letters and Journal of Economics, etc. He headed several research programs at the national, ministerial and provincial level, including those of the National Natural Science Foundation and the Humanities and Social Sciences Research Fund under the Ministry of Education. He was granted the Third Prize of the 7th Award for Outstanding Science Research Achievements in Institutions of Higher Education (Humanities and Social Sciences).
Yi Wen is a visiting professor at the Institute of New Structural Economics at Peking University, Assistant Vice President of Federal Reserve Bank of America (St. Louis Branch), Chinese national “Millennium Program” expert. He received his Ph.D. in Economics from University of Iowa in 1996. His research field is Macroeconomics. His research topics include Business cycle and economic fluctuation theory, Multiple Equilibrium and Market Failure in Dynamic Optimization, Asset bubbles that self-actualize under rational expectations, the Micro Basis and Dynamic General Equilibrium of Monetary Policy and Quantitative Easing Policy, Developing Political Economy and China’s Macroeconomy, etc. He has published more than 40 academic articles in the forefront of economics journal, such as Econometrica, Review of Economic Studies, Journal of Monetary Economics, Journal of Economic Theory, Economic Journal, European Economic Review, American Economic Theory, American Economic Journal: Macroeconomics. His monographs include The Making of an Economic Superpower——Unlocking China’s Secret of Rapid Industrialization (World Book Inc Press, 2016) and Great China’s Industrial Revolution (Tsinghua University Press, 2016).

Bo Hu joined the Institute of New Structural Economics at Peking University in 2017. He obtained his Ph.D. in Economics from Indiana University, Bloomington. His primary research interests include econometrics and macroeconomics. He focuses on time series and functional data analysis, and their applications in macroeconomics and finance.

Shenzhe Jiang obtained his Ph.D. from Texas A&M University in 2017. His research is in the field of Macroeconomics. He currently focuses on studies of dynamic contract, asset pricing and monetary economics.

Junjie Xia obtained his Ph.D. degree in Economics from the University of Southern California. His research fields are Macroeconomics, Macro Finance, and International Trade. His current research interests include financial distortion, trade friction, industrial upgrading, income distribution and other topics relevant to the Chinese economy - all based on macro models.

Xin Wang earned her Ph.D. from the University of Colorado Boulder in 2016 and her bachelor’s degree in Economics and Statistics from Peking University in 2011. Her research interests include international trade, development economics and labor economics. Currently, her research mainly focuses on the interrelationship between international trade, labor market and structural transformation.

Xiao Ke received a Ph.D. degree in Economics from Xiamen University. Her research interests include applied econometrics, urban economics and Chinese economy.
Zhengwen LIU  Post-doctorate
Dr. Zhengwen received her Ph.D. in Economics from the School of Economics and Management, Tsinghua University in 2017, and a bachelor's degree in Science from the Department of Physics, Tsinghua University in 2012. Her research fields include international trade, empirical study of industrial organization and industrial policy.

Xiaomeng REN  Post-doctorate
Xiaomeng Ren received his Ph.D. in economics from Zhejiang University. His research interest lies in the fields of macroeconomics and new structural economics. His recent research focuses on economic growth, innovation, Islamic finance and development finance.

Xuemin TANG  Post-doctorate
Xuemin received her Ph.D. in Economics from Renmin University of China. She was a visiting scholar in Rutgers University. Her research focuses on New Structural Economics, International Trade and Industry Economics. She is particularly interested in Development Strategy and Inequality.

Zirong YANG  Post-doctorate
Zirong Yang is a winner of Boya Postdoctoral Fellowship at Peking University. He received his Ph.D. in Economics from the School of Economics and Management, Wuhan University in 2016. His research fields include Spillover Effect of Monetary Policy and Financial Structure. He has published a dozen papers, presided over two National Youth Science Fund Projects (including one post-doctoral project), and participated in several national social science fund projects and a few key projects under the Ministry of Education.

Xi CHEN  Research Fellow & Chief Officer of INSE
Xi Chen is a research fellow and the Chief Officer of the Institute of New Structural Economics. She holds a Ph.D. degree from the School of Journalism and Communication at Peking University, a master degree from the Fordham University of the U.S. Her research interest lies in Cross-cultural Communication, Cross-cultural Management, Case study on Structural Transformation. She has written a number of academic papers on Cross-cultural communication and is the author of Cross-Culture Communication Management of Confucius Institutes, published by Peking University Press in 2016.

Caihui FU  Research Fellow
Dr. Fu is responsible for domestic think-tank research and discipline construction at INSE. He holds a Ph.D. in Economics from Xiamen University and he has presided over a number of National Social Science Fund projects (including post-doctoral ones) as well as research projects on the transition and upgrading of national and local governments. He has published over 20 academic papers and monographs (co-authored with Prof. Justin Yifu Lin) including New Structural Economics: Where New, Report on Global Economic Restructuring and Upgrading, and New Structural Economics Case Study. Dr. Fu also give an open course on Introduction to New Structural Economics (Theory and Practice) at Peking University at each spring semester.
Qiuyun ZHAO  Post-doctoral Researcher

Qiuyun Zhao holds a Ph.D. degree in Economics from Peking University. He has published over 20 papers in domestic and international core journals such as China Economist and Financial Research. He was granted more than 30 Chinese and foreign awards, including a First Prize by the National Post-Doctoral Academic Forum on Economics, Tan Chongtai Development Economics Scholarship, and a Second Prize by Shanghai Young Economist Forum. He has participated in several National Social Science Fund Projects, National Natural Science Fund (Key) Projects and local government think tank projects. His primary research fields are Land-use Right Transfer, Factor Income Distribution, and New Structural Economics.

Li HUI  Post-doctoral Researcher

Li Hui works at INSE as a core member of the domestic think-tank team that aims to enhance industrial upgrading and structural change in China. Obtaining her Ph.D. in Economics from Wuhan University in July 2016, she focuses her research on new structural economics, industrial economics, and environmental economics. Current research topics include structural transformation and industrial policy, environmental regulation and economic growth.

Jiewei LI  Project Research Specialist

Jiewei Li obtained his master's degree in Economics. He was a visiting student at Barcelona Graduate School of Economics and an alumnus of Ronald Coase Institute Workshop on Institutional Analysis. His research interest mainly lies in institutional economics, development economics and applied microeconomics. Prior to joining the INSE, he gained rich field study experience as an investigator for several significant field projects including China Household Finance Survey (CHFS) and China Small and Micro Enterprise Survey (CMES).

Xinxin DING  Project Research Specialist

Xinxin Ding received her master's degree in Rural Areas and Regional Development from Renmin University of China in 2016. Her research fields are economic development, structural change, labor market, inequality, and industrial policies. She currently focuses on economic transformation and industrial upgrading in Chinese regions.

Qiang ZHANG  Project Research Specialist

Qiang Zhang obtained his master's degree in Rural Areas and Regional Development from Renmin University of China in 2017. His research interest mainly lies in Agricultural Economics, Macroeconomics, China’s economy. He has participated in and contributed to several domestic think-tank projects that aims to facilitate industrial restructuring and upgrading including of Chinese local regions including Tibet, Jilin Province, Hejian City (Hebei Province), and Zhongshan City (Guangdong Province).

Shuting ZHANG  Project Research Specialist

Shuting Zhang finished her master study in Social Work at Peking University. Her research interest lies in development economics, population economics, industrial structure transformation and upgrading, and industrial policy. Currently, her research focus is the Chinese regional industrial structure transformation and upgrading. She has participated in think-tank projects in Tibet, Jilin Province, Hejian City (Hebei Province), and Zhongshan City (Guangdong Province).
Our Team

Jia Yu is responsible for the application of New Structural Economics to the international investment practice. Her research fields focus on empirical studies of China’s “Going Global”, diagnosis of industrial park and Special Economic Zones, as well as China’s overseas investment and the interaction of the manufacturing, energy and mining sector and their roles in the process of industrialization for Belts & Roads countries. Prior to joining the INSE, Dr. Yu had worked as a Director of Dept. of Business Development & Public Relations at State Power Investment Corp. (SPIC) where she gained over eight years’ experience in overseas investments (energy and mining), research on global resources market and China’s outward FDI, business negotiations, government affairs and public relations at corporate level. She started her career as a consultant for the utility industry with Accenture after receiving her Ph.D. degree in Development Economics from CERDI-CNRS in France and her two bachelor’s degrees in French Language and Literature and Economics from Peking University.

Yanchao Li is a Researcher at the INSE and Honorary Fellow at Manchester Institute of Innovation Research (MIOIR), the University of Manchester. Prior to joining the INSE Yanchao worked as Consultant/Economist at the World Bank, and Research Associate at MIOIR. Yanchao’s research has focused on innovation, entrepreneurship and industrial policies. She performed as task leaders in large-scale projects such as the EU H2020 project “Industrial Innovation in Transition”, the World Bank innovation flagship project “Country Innovation Diagnostics”, and the Inter-American Development Bank project “Spurring Innovation-led Development in LAC countries”. She has published over 10 articles in well-known international journals, as well as book chapters and policy reports upon invitation. She received her Ph.D. from the University of Manchester, MSc. from Tsinghua University, and BSc. from Shanghai Jiao Tong University.

Chenmei Li obtained her master’s degree in Economics of Development from Erasmus University. Prior to joining the INSE, she used to be a research assistant at the International Institute of Social Studies of Erasmus University Rotterdam and once worked as a project assistant at China international Center for Economic and Technical Exchanges.

Xinyue Wu got her master’s degree in Political Economy from King’s College London. She participated in the policy consulting projects for industrial parks in Asian and African countries, and her research areas are development finance, infrastructure financing for industrial parks, global buyers and global value chain.

Sarah Hager-Loss has more than five years’ experience in the private sector. In 2012 she co-founded Oxford Logical Consulting, a U.S. based consulting partnership working in operational planning, strategic technology evaluation, and economic consulting. Ms. Hager-Loss is a graduate of the University of Oxford in Philosophy, Politics and Economics (PPE). Prior to graduation, she worked as an analyst intern at global security think-thank, the Royal United Services Institute (RUSI), in London.
Our Team

International Think-tank

Tozo KOKOU WOTODJO  Part-time Project Research Specialist

Tozo KOKOU WOTODJO is a Ph.D. candidate in International Economics of University of International Business and Economics (UIBE). His primary research areas are global value chain, FDI, and international trade. His main work at INSE include policy consultancy and research in industrial park projects for the governments in Benin and Nigeria. Tozo is proficient in French and English.

Operation & Administration

Jing LU  Assistant to Dean

Currently responsible for the Dean’s daily routine, Jing Lu was previously in charge of coordination of international project and arrangement of academic meetings at INSE. Before, she worked for China Road & Bridge Corporation at Kigali Office (Rwanda), in charge of foreign affairs and bidding. She graduated from Beijing Foreign Studies University with a major in French Language and Literature.

Beina XIA  Assistant to Executive Deputy Dean

Beina Xia is mainly responsible for assisting Executive Deputy Dean in strategic development planning, external relations maintenance, internal operations, conference organization, etc. She holds a master's degree in British and American Literature from Nanjing University, where she also studied international relations at Hopkins-Nanjing Center.

Shaona MA  Research Assistant

Shaona is responsible for organization of NSE Summer School, Winter School and Seminars, application and management of academic projects and research funds, as well as routine coordination and management for the Academic Deputy Dean. She obtained her master's degree in International Chinese Education from Capital Normal University and was a visiting student at Ca' Foscari University of Venice.

Shengtao YU  Research Assistant

Shengtao is responsible for management of NSE Special Fund, arrangement of international conferences, International Development Forum, AEA candidate recruitment, assistance for visiting scholars and students and visa application the faculty. He obtained a MBA degree from Bangkok University.

Jing Ding  Domestic Think-tank Operation Specialist

Jing Ding is responsible for daily operations for the domestic think-tank group, occupying a role in international project study, application, establishment and management as well as brand building and promotion, etc. She graduated from Beijing International Studies University with major Portuguese. Prior to joining INSE, she served as a liaison in the International Department of the CPC Central Committee, managing foreign political party cadre’s visit to China and had training experience with MOFCOM international business officials.
Our Team

Xiaolu Li  International Think-tank Operation Specialist

Xiaolu Li is responsible for daily operations for the international think-tank group. Her main roles include international project study, application, establishment and management as well as brand building and promotion, etc. She holds a master’s degree in Education from University of Maryland, College Park with project experience in Asian Development Bank’s technical assistance to China and national loans.

Yanru Ye  Policy Promotion & Communication Specialist

Yanru Ye occupies a role in NSE policy promotion and communication, brand building and public and media relations management at INSE. She obtained her master's degree in Economics from Université Paris 1 - Pantheon Sorbonne and Paris School of Economics. Before joining INSE, she worked as an economic analyst at Makkah Investment and had internship experience at Accenture, Global Economics Group and Envision Capital, etc.

Qianhe Zhou  Policy Promotion & Communication Assistant

Qianhe Zhou is responsible for the operation and maintenance of INSE social media portals including official website and WeChat account, as well as news drafting and publicity for significant events and conferences. She received her master's degree in International Political Economics from the University of Sheffield, UK.

Ying Huang  Human Resources Specialist

Ying Huang is responsible for recruitment, personnel performance evaluation, training and other HR-related duties. She obtained a MPA degree from Peking University and previously worked at the Chinese Academy of Sciences as an HR officer.

Ye Deng  Finance Specialist

Ye Deng she is in charge of daily financial operation and management and reimbursement verification for both domestic and international activities. She graduated from Beijing Normal University.

Jiaying Wang  Administration Specialist

Jiaying Wang is responsible for fixed assets procurement and management, administrative and financial archives management, daily reimbursement review, etc. She graduated from Beijing Jiaotong University and had rich experience of administration at China Securities and CCTV-6 portal.
New Structural Economics (NSE), proposed and advocated by Professor Justin Yifu Lin, adopts the neoclassical approach to study the determinants and causes of change in the economic structure during development, based upon factor endowments and endowments structure at any given time. NSE underscores the essential role of both an effective market and a facilitating government in achieving rapid, inclusive, and sustainable development. New Structural Economics has been endorsed by more than ten Nobel Laureates in Economics, including Joseph Stiglitz, Gary Becker, Douglass North, Robert Fogel, Michael Spence and George Akerlof, and is recognized as the third wave of development economics after Structuralism and Neoliberalism.

New Structural Economics starts from the argument that a country’s economic development is a process of structural change with continuous industrial and technological upgrading (economic base) and the improvement of institutional arrangements (superstructure). NSE emphasizes that this process entails not only the “effective market” in the allocation of resources, but also the “facilitating government” to overcome the inevitable market failures emerging from the structural change and to compensate for the defects caused by the premature market. New Structural Economics proposes that “a facilitating government is the premise of an effective market; an effective market is the realization of a facilitating government”.

Indigenous and independent theoretical innovations based on New Structural Economics is the centre of INSE/CNSE’s development vision. Activities such as NSE teaching, NSE Symposium (Summer School/ Winter School), NSE International Conference, and NSE International Development Forum, etc. are organized annually to facilitate theory development, to practice the application of New Structural Economics, and to attract excellent scholars at home and abroad to join the camp of the theoretical innovation and application of NSE.
Teaching of New Structural Economics

Graduate Courses

**Advanced Seminars on New Structural Economics,**
*by Justin Yifu Lin*
This course aims to give a systematic and solid introduction to the framework of New Structural Economics and its progress and achievements in theoretical and empirical research. Outstanding researchers from the INSE are invited to demonstrate the methodology and techniques used in NSE theoretical modeling, data collection, and empirical analysis.

**Advanced Seminars on Economic Growth,**
*by Yong Wang*
This course familiarizes students with the economic growth theory and helps them to identify a research topic from the perspective of New Structural Economics. By the end of the term, students will be able to independently build economic growth models and have a deeper understanding of research in the field of economic growth.

**Studies on Chinese Economy (1),**
*by Justin Yifu Lin*
This course sheds light on the theoretical framework of New Structural Economics, the progress and achievements of NSE theoretical and empirical research and its implications, and introduces and closely analyzes the development of the Chinese economy from the perspective of New Structural Economics.

**New Structural Economics Seminars,**
*by Yong Wang, Xin Wang and Jiajun Xu*
This seminar series aims to enhance the research and academic exchanges on NSE. Each session influential domestic or international scholars are invited to a themed seminar to share their insights in New Structural Economics through a public lecture combined with in-depth discussion.

Undergraduate Courses

**Chinese Economy,**
*by Justin Yifu Lin*
The course summarizes the successful practices and failures of China and that of other developing countries or regions’ economic development and analyzes from a NSE perspective the historical rise and fall of China. It also focuses on the achievements since the reform and opening-up, major economic and social problems China faces, as well as the causes and solutions.

**Introduction to New Structural Economics,**
*by Caihui Fu*
This course introduces the theory development of NSE and the integration of NSE within other economic disciplines such as industrial economics, labor economics, financial economics, regional economics, international economics, environmental economics and institutional economics, etc. The course also deliberates on the application of NSE in regional industrial upgrading and transformation across China and introduces the methodology to conduct industrial diagnosis of an economy at a national and regional level. The practical application of NSE is supported by the presentation of a couple of first-hand case study and reports done by the INSE researchers.

**International Trade,**
*by Xin Wang*
The course gives an overview on the research being done in the fields of international trade, cross-boarder movement of goods, services and factors. The topics covered include the benefits of trade, factor movement, the patterns of international trade, and the impacts of various trade policies.

**Financial Econometrics,**
*by Bo Hu*
*(taught in Chinese and English)*
The course covers essential tools and theories that can be used to analyze financial data and to test market models. The course focuses on the empirical techniques, and guides students in conducting analysis with real financial data.

**Frontiers of International Development: Theory and Practice,**
*by Jiajun Xu*
The course aims to inspire students’ independent thinking on the frontiers of international development. The students are encouraged and guided to apply the analytical tool of NSE - Growth Identification and Facilitation Framework (GIFF) - to policy research. Students will have the opportunity to communicate face-to-face with prestigious experts in the field of international development, and to learn about the latest progress of developing countries’ practices in sustainable economic transition through country-based policy consulting simulations with ambassadors and officials to China.

**Economics Research Training,**
*by Xin Wang*
Aiming to familiarize the students with economics research and writing, the course adopts the form of small class lecturing, combined with presentation assignments and group discussion. By the end of the course, the students are expected to be able to define a interested research topic and independently complete a high-quality research proposal that lays the foundation for their undergraduate dissertations.

**Macroeconomic Theory,**
*by Junjie Xia (taught in English)*
The primary goal of this course is to teach students macroeconomics concepts and theories that shed light on how the real world economy works. By the completion of this course, students are expected to a) understand how to evaluate macroeconomic conditions such as inflation, unemployment and growth; b) understand how macroeconomic conditions are affected by monetary policy and fiscal policy; c) critically evaluate the pros and cons of each policy and; d) precisely interpret macroeconomic data and accordingly employ certain macroeconomic models, etc.

Courses at the Institute of South-South Cooperation and Development

**New Structural Economics and Policy Design,**
*by Justin Yifu Lin*
As a core course for the Institute of South-South Cooperation and Development, this course will walk students through New Structural Economics, introduce the development experiences of the developing countries and guide the international students in applying NSE to the economic development of their countries.
The New Structural Economics Symposiums (Summer School/Winter School) are annual academic events hosted by INSE to promote and deepen the understanding of NSE among young scholars and students worldwide. The symposiums bring together influential scholars and young students for intensive brainstorming, academic training, and roundtable discussions related to New Structural Economics.

The NSE International Summer School introduces NSE and China’s development experience through class teaching and field study. As of now, the NSE International Summer School has successfully held four sessions and trained hundreds of students from developing countries across the world. On the other hand, the Winter School adopts the form of symposium and roundtable discussions to deepen the theoretical system and research of NSE and held its third session in 2017. The two activities serve as platforms for academic exchanges and have gained widespread recognition both domestically and abroad.

**The 4th New Structural Economics Symposium (Summer School)**

The 4th New Structural Economics Symposium (Summer School) was successfully held at Peking University from July 1st to 5th and attracted a total number of 57 young scholars and students from 23 countries. The symposium featured six themed lectures by Professor Justin Yifu Lin, Jiandong Ju, Yi Wen, Yong Wang, Gene Grossman and Kuen Lee, two think-tank practice sessions, an international workshop on global value chain, and four mid-term paper presentations by awardees of the New Structural Economics Fund. The content covered the thoughts, methodology, and theory of New Structural Economics as well as its application in China, Korea, and African countries. To help students gain a vivid impression of industrial transformation and upgrading, the summer school arranged a one-day field study to collect first-hand data in Hejian City, Hebei Province, where the policies of NSE was first embraced and applied by the local government. At the closing ceremony, trainees received Certificates of Completion and encouragement from Prof. Justin Yifu Lin to devote themselves to the development of their countries and the world.

**The 3rd New Structural Economics Symposium (Winter School)**

The 3rd New Structural Economics Symposium (Winter School) was held from December 18th to 23rd and comprised sessions on “Industrial dynamics and infrastructure”, “Income distribution and industrial upgrading”, “China’s economic slowdown: causes and solutions”, “New Structural Finance”, “International trade and industrial upgrading”, “NSE modeling and mathematical methods”, “Database construction”, and “Domestic and international think-tank studies”, etc. More than a hundred renowned economists and students attended the symposium, including prestigious Professor Chong’en Bai, Bai Kaiji, Haoquan Chu, Yongmiao Hong, Xiaodong Huang, Yiping Huang, Jiandong Ju, Xinchuang Li, Guo’en Liu, Guoqiang Tian, Neng Wang, Xiaoying Wu, Haipeng Xing, Xianchun Xu, Zhigang Yuan, Guohua Zhang, Hao Zhou and Xiaodong Zhu, etc. The winter school included closed-door meetings, where a dozen of the top Chinese universities and publishing houses were invited to discuss the cooperation of INSE branches, discipline construction, talent cultivation, and publishing.
International Conference on New Structural Economics

The International Conference on New Structural Economics is an annual academic event of the INSE/CNSE that aims to review the evolution of development economic theories since the 1950s and 1960s. The conference began in September 2012 and held its 2nd and 3rd session in the year of 2015 and 2016 respectively. Internationally-renowned economists and scholars gather together to discuss the positioning of the theoretical system of New Structural Economics in the mainstream western economics, the deepening of NSE theoretical innovation, which will in turn facilitate autonomic development of theoretical systems and establishment of academic base for economic research and application in developing countries.

This year, the 4th International Conference on New Structural Economics was held at Peking University on December 9th and 10th. The theme of the conference is “Structural Transformation, Infrastructure Investment, and Economic Development”. Keynote speeches were delivered by world-renowned experts and scholars, including Justin Yifu Lin, Dean of the INSE, Qifan Huang, Vice Chairman of Financial and Economic Committee of the National People’s Congress, Juzhong Zhuang, expert from Asian Development Bank, Shangjin Wei, Professor at Columbia University, and Jong-Wha Lee, Professor at Korea University. Over ten economic scholars presented their academic papers at the conference, including Shenzhe Jiang, Assistant Professor at the INSE, Xupei Luo, Senior Economist at the World Bank, Kenichi Ueda, scholar from the University of Tokyo, Dan Liu, Associate Professor at Shanghai University of Finance and Economics, Dr. Zhe Fu from University of International Business and Economics, Dr. Qinghua Zhang from Guanghua School of Management, Peking University, Professor Han Li from Southwestern University of Finance and Economics, and Dr. Guiyiing Laura Wu from Nanyang Technological University.
## NSE Special Research Fund

The NSE Special Research Fund created by the INSE/CNSE in 2016 is used to sponsor PhD candidates and young scholars to conduct research in New Structural Economics. The purpose of the fund is to encourage the young scholars to delve into the field of the development of the world economy, especially focusing on the economic development of the developing countries, thus driving the advancement of the third wave of economic thought of development.

Each year, the selected awardees and those sponsored shall present their research to the Academic Review Committee of the fund at the end of the year. Outstanding papers selected by the Academic Review Committee will have the opportunity to participate in the forthcoming International conference on New Structural Economics.

### Academic Review Committee
The Academic Review Committee consists of domestic and international senior scholars in the field of development economics who focus on NSE, and is chaired by Professor Justin Yifu Lin. Committee members work as advisors to give academic guidance to the sponsored candidates.

### The 2nd Session of NSE Special Research Fund
In 2017, the Fund created three sponsorships and two prizes to encourage and support ten selected research topics and groups as stated in the following.

Both LEs and SMEs Matter but Differently at Different Stages of Development: Applying the New Structural Economics Framework
New Structural Economics Seminars

The seminar series for New Structural Economics provide a platform for regular academic discussion and exchanges that deepen and extend the research of NSE. For each seminar, the INSE invites an influential expert or scholar from China or abroad to present his or her study and to exchange insights and ideas on theory foundation, direction, and methodology of NSE-related researches. In total, 21 seminars were successfully held throughout 2017.

New Structural Economics
International Development Forum

With the tenet of “Innovate Development Notion and Explore Development Practice”, the New Structural Economics International Development Forum (NSEIDF) aims to bridge the gap between research and practice in international development by hosting international dialogues among influential institutes, scholars, and experts in the field. In 2017, the INSE had successfully held eleven sessions of NSEIDF.

11th NSEIDF: EBRD Transition Report 2016-17: Transition for all

On March 21st, 2017 at the 11th NSEIDF, Dr. Sergei Guriev, Chief Economist at the European Bank of Reconstruction and Development (EBRD), gave a keynote speech entitled “Transition for all: Equal opportunities in an unequal world”. The speech drew its outlines from the EBRD Transition Report 2016-2017, which showed that the economic transition in the EBRD region covering 34 emerging countries had been far from smooth, indicated by comparatively lower life satisfaction and a reduction in height for those born during the transition. In recent years, the EBRD region has caught up with richer countries in terms of happiness and closed part of the income gap, yet the benefit to each individual varies.

12th NSEIDF: MDBs’ Role in a Changing Development Landscape

On April 25th, 2017 at the 12th NSEIDF, Dr. Daniel F. Runde, Director of the Project on Prosperity and Development (PPD) at Center for Strategic and International Studies (CSIS), and Dr. Conor Savoy, Deputy Director of PPD and Fellow at CSIS, gave a keynote speech named “MDBs’ Role in a Changing Development Landscape”. The speech pointed out that the MDBs’ business model is changing because some middle-income countries have moved to fragile states in the wake of the 2009 financial crisis because the MDBs’ human resources, instruments, and incentives are not yet fully aligned for them to operate in fragile and conflict affected states. They also shed light on how the MDBs could possibly adapt to address the changing development world over the next 15 years.

13th NSEIDF: Multilateral Development Banking for This Century’s Development Challenges: Five Recommendations to Shareholders of the Old and New Multilateral Development Banks

On May 11th, 2017, the CNSE and the US think-tank Center for Global Development jointly organized the 13th NSEIDF on “Multilateral Development Banking for This Century’s Development Challenges: Five Recommendations to Shareholders of the Old and New Multilateral Development Banks”. Representatives from the Asian Infrastructure Investment Bank, New Development Bank, Asian Development Bank, and Ministry of Finance, P.R. China, conducted in-depth discussions on various related issues.

14th NSEIDF : Unlocking Africa’s Investment Potential

On May 25th, 2017 at the 14th NSEIDF, Dr. Albert G. Zeufack, Chief Economist of the Africa Region of the World Bank, addressed a presentation on “Unlocking Africa’s Investment Potential”. The presentation showed that there are signs of recovery, but that Africa is not out of the woods yet and that it is imperative to implement sound macroeconomic and structural reforms to reverse the decline and in turn boost domestic and foreign investment in Africa. African countries must seize the moment and work with the international community to crowd-in investment funding. Mr. Shuilin Wang, Adviser for Africa External Communications and Partnerships and Regional Coordinator for Partnership with China of the Africa Region of the World Bank, also joined the event to answer questions related to the cooperation and partnership between WB and China in Africa.

15th NSEIDF: Strengthening Performance of Chinese Middle Market Companies: the Role of Private Equity

On May 31st, 2017 at the 15th NSEIDF, Roger Leeds, Professor from Institute of Advanced International Studies at Johns Hopkins University, addressed a keynote speech on “Strengthening Performance of Chinese Middle Market Companies: the Role of Private Equity”. The presentation demonstrated the distinctive capacity of private equity investors to selectively provide both scarce financial resources and value creating opportunities that Chinese middle market companies require to grow and compete. The speech also highlighted the characteristic of China’s private equity industry that distinguishes it from virtually all other countries, in which the government’s active role in promoting private equity as a positive force for China’s overall growth and development.
16th NSEIDF: Development Banks and Green Energy: South-South Cooperation for Structural Transformation and Sustainable Development

On June 7th, 2017, the CNSE and Boston University Global Economic Governance Initiative jointly organized the 16th NSEIDF on "Development Banks and Green Energy: South-South Cooperation for Structural Transformation and Sustainable Development". Representatives from the Asian Infrastructure Investment Bank, Islamic Development Bank, New Development Bank, and national development banks from China, Mexico and South Africa participated in panel discussions.

17th NSEIDF: Book Launch: Age of Discovery - Navigating the Risks and Rewards of Our New Renaissance

On August 26th, 2017 at the 17th NSEIDF, Ian Goldin, Professor and Director of the Oxford Martin School and Chris Kutarna, Fellow of the Oxford Martin School, launched their new book Age of Discovery - Navigating the Risks and Rewards of Our New Renaissance. Professor Ian Goldin delivered a keynote speech on how we could navigate the risks and rewards of our New Renaissance. According to him, globalization has brought about a large amount of uncertainties, which provides both chances for countries to be more closely connected and for ideas to be more freely spread, as well as problems such as inequality and population explosion to occur. Dr. Chris Kutarna shared his own experience with China's changes and a brief overview of the book.

18th NSEIDF: Structural Transformation in Developing Countries: A UNCTAD Perspective

On September 1st, 2017 at the 18th NSEIDF, Dr. Richard Kozul-Wright, Director of the Globalization and Development Strategies Division of the UN Conference on Trade and Development (UNCTAD), delivered a keynote speech on emerging economies in the era of hyper globalization. He pointed out that hyper globalization has exerted a skewed and uneven impact on developing countries, therefore, the status quo required a reassessment of the current rules and practices of the international economic game, with a much greater accommodation of active macroeconomic policies as well as industrial policies. He concluded with several points on industrial policies, including targeting diversification and upgrading to foster strong productivity growth, bringing together macroeconomic, financial trade and industrial policies to create synergies.

On September 14th, 2017 at the 19th NSEIDF, Dr. Jörg Mayer, Senior Economist at the UN Conference for Trade and Development, launched the Trade and Development Report 2017 - Beyond Austerity: towards a Global New Deal and delivered a keynote speech with the theme of "Robots, Industrialization and Inclusive Growth". The seminar emphasized that robot use depends on both technological and economic feasibility. He also discussed the potential impacts of industrial robots on developing countries' industrialization strategies, structural transformation, employment and wage developments as well as related policy issues.

20th NSEIDF: Foreign Aid in an Era of Global Development Challenges

On November 16th, 2017 at the 20th NSEIDF, Dr. George Mavrotas, Senior Research Fellow at International Food Policy Research Institute, gave a keynote speech entitled "Foreign Aid in an Era of Global Development Challenges". The speech provided an in-depth overview and critical assessment of the aid effectiveness literature, introduced the context of more recent developments at the global level, and offered useful policy insights on foreign aid in an era of global development challenges.

21st NSEIDF: Balancing State and Market Development

On November 20th, 2017 at the 21st NSEIDF, Dr. Adair Turner, Former Chairman of UK's Financial Services Authority, addressed a keynote speech on "Balancing State and Market Development". The consensus view of Washington on economic development is that free markets alone will drive an optimal path of innovation and structural change, while the appropriate state role is limited to the provision of physical and social infrastructure. But economic history suggests limits to this model for both developing and developed countries, and recent developments in green technology illustrate the potentially important role of state support in driving technological innovation and cost reduction. Dr. Adair Turner explored these themes with a particular reference to energy and climate change-related issues, and suggested key questions arising from China's development policy within the context of its "Made in China 2025" initiative.
New Structural Economics
Academic Team Meetings

Officially launched in September 2016, the CNSE/INSE Academic Team Meetings are organized on a weekly basis. The meetings focus on the latest research progress in New Structural Economics. Scholars inside and outside the CNSE/INSE are invited to present their latest work and conduct in-depth exchanges on ideas to advance cutting-edge research on NSE. In 2017, 15 successful NSE Research Team Meetings were held.

Academic Exchanges and Conferences

Commemorative Symposium for the 30th Anniversary of Professor Justin Yifu Lin’s Teaching

From May 12-13th, 2017, the Center for New Structural Economics and the National School of Development at Peking University jointly hosted the Commemorative Symposium to celebrate the 30th Anniversary of Prof. Justin Yifu Lin’s teaching. Prof. Joseph Stiglitz, Dr. Celestin Monga, and Prof. Ross Garnaut extended their congratulations via video. The symposium featured 27 academic paper presentations, three keynote speeches, and was graced by the presence of over 400 prestigious experts and scholars. The distinguished guests reflected upon Prof. Lin’s contributions towards economic research, teaching, and policies in development and reform.

International Symposium on Rethinking the Economic Role of the State

On June 3rd, 2017, the International Symposium on Rethinking the Economic Role of the State: New Structural Economics and Its Critics was co-hosted by the CNSE and Man and the Economy (a Ronald Coase Institute journal). The symposium featured keynote speeches and ten paper presentations. Expert and scholars from home and aboard, including Justin Yifu Lin, Yong Wang, Ning Wang (Editor-in-chief of Man and the Economy), Dani Rodrik, Pranab Bardhan, Gerard Roland, Bill Megginson and Shiping Tang, gathered together to have in-depth discussions on the economic functions of the State, covering topics such as “state capacity and development”, “institutional foundation of economic growth”, “industrial upgrading”, “structural change and middle income trap”, and “the role of China Development Bank in economic structural transformation”, etc.

NSE Sessions at the 11th China Conference on Development Economics

On July 9th, 2017, the 11th China Conference on Development Economics themed “Supply-side Structural Reform and New Structural Economics” was successfully held at Wenzhou University. The two-day conference, led by the Development Economics Sub-Association under the Chinese Association of Foreign Economics with assistance from the CNSE, hosted about one hundred scholars from prestigious domestic and international universities, a dozen domestic journals, and several mainstream media organizations. Justin Yifu Lin gave the keynote speech entitled “New Structural Economics, Viability and New Theoretical Insights”, Yong Wang chaired the NSE Roundtable Discussion attended by Justin Yifu Lin, Xianhai Huang, Changwen Zhao, Sen Wei, Xibao Guo, Jianhua Zhang, and Chusheng Ye hosted the first session of the New Structural Economics Forum.

NSE Sessions at the Thematic Forum of China Economics Annual Conference

On August 12th, 2017 at the Thematic Forum of China Economics Annual Conference & Seminar on Internationalization and China’s Economic Transition, the CNSE organized two NSE related sessions on “Growth, Trade and Industrial Upgrading” and “Innovation, Productivity and Industrial Upgrading”. At the two seminars chaired by Yong Wang, Deputy Director at CNSE, seven academic works regarding economic growth, industrial upgrading, and innovation, etc. were presented and discussed.
The CNSE-CDC Closed-door Meetings on Data and Statistics

In 2017, the Center of New Structural Economics (CNSE) and the China Data Center at Tsinghua University (CDC) jointly organized two closed-door seminars on data. During the first meeting from September 15-17th, six domestic senior statistics experts and departmental (deputy) directors from the National Bureau of Statistics, the Survey and Statistics Department of People’s Bank of China, and the Statistics Department of General Administration of Customs were invited to share their profound panoramic insights on China’s statistics data. During the second meeting from November 4-5th, the (deputy) directors of Census Center, Department of Population and Employment Statistics and China Economic Monitoring & Analysis Center at NBS and Department of Balance of Payments at State Administration of Foreign Exchange were invited to give lectures and interact with other professionals on the current status, issues, and future prospects of China’s statistics.

NSE Session at the 17th China Economics Annual Conference

New Structural Economics Session has become a fixture of the China Economics Annual Conference. From October 13-15th, 2017 at the 17th China Economics Annual Conference, Yong Wang, Zhengwen Liu and Xiaomeng Ren organized and hosted the NSE session. Six scholars from top domestic universities presented their papers covering optimal financial structure, economic growth, infrastructure, and industrial policies, etc. The experts and scholars present at the conference conducted in-depth discussions of the presented works.

The first FRI-PKU Seminar on New Structural Economics

From October 14-19th, Yong Wang led a ten-person delegation to visit the Yunnan University of Finance & Economics. Together with the research team headed by Prof. Gang Gong, Dean of School of Economics and Director of Financial Research Institute (FRI), the CNSE team held the 1st FRI-PKU Seminar on NSE, which included a symposium, a themed lecture, an intensive closed-door academic training session, and a series of team building activities that helped achieve in-depth academic exchanges. A total of 12 papers in relevant fields were presented and discussed.

NSE and Its Applications in Agricultural Development: Symposium in Honor of Prof. Justin Yifu Lin for His 30th Anniversary of Teaching

From October 21-22nd, the CNSE and China Agricultural Economic Review (CAER) co-held the "NSE and Its Applications in Agricultural Development: Symposium in Honor of Prof. Justin Yifu Lin for His 30th Anniversary of Teaching". Justin Yifu Lin, Yong Wang, Baozhong Su (Director of CAER Editorial Office), Xiwen Chen (Vice Chairman of CPPCC Economic Committee), Jikun Huang (Professor at School of Advanced Agricultural Sciences, PKU), Linxiu Zhang (Professor at Chinese Academy of Sciences), Carl Pray (Professor at the State University of New Jersey), Alain de Janvry (Professor at University of California, Berkeley), and other senior experts and scholars attended the symposium. China Agricultural Economic Review, an English SSCI periodical, published an NSE-related issue celebrating the 30th anniversary of Prof. Lin teaching.

Media Workshop on New Structural Economics

From November 14-18th at Peking University, the CNSE held its first ever media workshop on New Structural Economics. Around 20 senior journalists registered for the workshop to learn more about NSE from Justin Yifu Lin, Yong Wang, Yi Wen, Xi Chen, Caihui Fu, Jia Yu, Yan Wang (Former Senior Economist at the World Bank), Yan Shen (Professor at the NSD, PKU), Huilin Lu (Professor at Department of Sociology, PKU), and Yining Zhao (Chief Reporter of 21st Century Business Herald). The workshops contained comprehensive sessions in theoretical framework, methodology, application, and case study reports.

Research Projects

The INSE/CNSE is committed to applying NSE thoughts, theories, models, and diagnostic tools to domestic and international practices. The INSE/CNSE also initiates a series of discussions and exchanges on think-tank construction, development and a wide range of domestic and international think-tank networks and partnerships. Using the NSE growth identification and facilitation policy analytical framework, the INSE/CNSE think-tank serves the developing countries to upgrade local industrial structures and to achieve economic growth.

As one of the leading think-tanks in China, the INSE/CNSE brings together both domestic and international experts to serve the economic restructuring and upgrading in developing countries by offering a package of services that translates theory into practice through policy-focused studies, consultancy, and training. The INSE/CNSE has launched multiple think-tank service-related projects including “Global Research Consortium on Economic Structural Transformation”, “Industrial Transfer and Relocation”, and the “NSE Forum for Province/City/County Economic Transformation and Upgrading”. The CNSE/INSE has also fostered in-depth cooperation with a number of B&R and African countries, domestic government institutions such as CPC Publicity Department, Ministry of Commerce, National Development and Reform Commission, All-China Federation of Industry and Commerce, to focus on research policy-focused consultancy, training, implementation planning, case summary, and the development of locally-based CNSE/INSE branches (in forms of practice bases and workstations). The think-tank team has so far visited and advised dozens of countries, hundreds of industrial parks and counties, and thousands of business leaders.

The domestic project team has traveled to the Tibet Autonomous Region, Jilin Province, Zhongshan and Guangzhou in Guangdong Province, Ningbo in Zhejiang Province, and Shanghai for field surveys. The international team has visited Ethiopia, Nigeria, Benin, Pakistan, Poland, Djibouti and Nepal, etc. for first-hand investigations, and implemented INSE/CNSE’s “Industrial Planning-Parks & Zones Design-Investment Promotion” one-stop international service model.

The INSE/CNSE has become a leading flagship think-tank in the field of international development by developing an innovative toolbox of policy analysis that features a NSE database based on the collection of first-hand information that provides methodological and statistical support to other think-tanks.
Domestic Projects

1. **Jilin Province: Research on Jilin’s Economic Structural Transformation and Upgrading**

Launched in August 2016, the Jilin Research Project was designed to provide a multifaceted plan to serve the province’s economic transformation and upgrading by applying the NSE theory and analysis tools. The ten-person project team completed a eighteen-day preliminary field investigation and survey in November 2016.

On August 19-22nd, 2017, the domestic team led by Prof. Lin visited Changchun City and had in-depth discussions with the Jilin Provincial Development and Reform Commission (JDRC) on how to realize local industrial transformation and upgrading. During the visiting at a 500-participant Provincial CPC Committee collective learning session chaired by Chaolu Bayin, Jilin Provincial Party Committee Secretary, Prof. Lin delivered a themed lecture entitled “Accelerating Economic Transformation and Upgrading and Rejuvenating the Real Economy”, and published a special report on “Industrial Policy and Development” at a workshop consist of over 400 attendees including departmental leaders and officials from different governmental entities.

At a panel discussion chaired by Guiwu An, Director of JDRC, Dr. Caihui Fu introduced the exposure draft of Report on the Transformation and Upgrading of Economic Structure in Jilin Province. Then together with the JDRC officials, the team had vigorous discussions and analysis on Jilin’s main industry clusters, i.e., agriculture, healthcare, textile, equipment manufacturing, renewable energy, new materials, and next-generation information technology, and explored the possible economics transformation and upgrading approaches.

2. **Tibet: Research on the Development of Tibetan Characteristic Industries**

The Project focused on Tibet’s distinctive industries and its transition and upgrading and economic development across cities and regions. During 2016-2017, the CNSE research team conducted five extensive field studies in the form of interviews and surveys in Tibet, covering over 360 enterprises and 40 government departments. The report drew on these first-hand investigations to understand Tibet’s characteristic industries and the challenges they face and to come up with effective and feasible policy solutions.

On September 18th, 2017, the report on the study of Tibet’s characteristic industries come under the scrutiny of a third-party review panel from the School of Economics, Central University of Finance and Economics. The experts and government officials closely reviewed and commented on the report.

On September 28-30th, the CNSE team landed in Lhasa, the capital of Tibet for the symposium about the research report and the inaugural ceremony of the Tibet University CNSE/INSE Sub-centre. Prof. Lin and the team met with Yingjie Wu, Party Secretary of the Tibet Autonomous Region, and Qizhala, Tibet Governor respectively, to exchange opinions on the development agenda of the Sub-centre in the areas of discipline design, academic exchanges, talent cultivation, Tibet’s characteristic industrial development, altoplana economy, ethics, religions, culture, and civil life.
Guangzhou: Supporting the Landing of B&R Landmark Projects

On February 21st, 2017, Prof. Justin Yifu Lin, Dr. Jia Yu, Dr. Gang Chen (former Post-doctoral Researcher at CNSE) and Research Specialist Jiewei Li traveled to Guangzhou to visit different enterprises with the ambition of “Going Global”. During the trip, the team met with Mr. Guohui Wen, Mayor Guangzhou City, Mr. Chaolin Cai, Deputy Mayor and department heads of Business, Economics and Investments. Prof. Lin noted that local enterprises shall seize the opportunity to expand their investment layouts in the global value chain, especially in African and B&R countries where an abundant amount of comparative advantages exist such as labor and natural resources. He then suggested a partnership between the governments of Guangzhou and Benin to establish a landmark B&R project - a Benin-based industrial park oriented to Guangzhou enterprises.

The CNSE team also held a discussion with representatives from the Department of Commerce of Guangdong Province, local industrial associations, and textile enterprises at the premise of the Commerce Department. The discussion centered around the latest progress of African investment promotion in Guangdong, the status of local textile industries, the operation performance of enterprises, overseas investment opportunities, company’s willingness and difficulties in Going-out, and the policy support needed. At the end of the meeting, the CNSE and Department of Commerce jointly agreed to research on supporting the creation of B&R landmark projects.

Zhongshan: Industrial Transformation and Upgrading Research

The project was officially launched in May of 2016, followed by a three-day preliminary field survey in October. In 2017, from June 21st to 23rd, Dr. Xi Chen and Dr. Bin Huang led a team to Zhongshan to conduct further investigations into the traditional manufacturing fields including household appliance, equipment, textile, furniture as well as the healthcare and emerging strategic industries. The project team also held mid-term discussions with the municipal government.

On November 3rd, 2017, the final report titled “Case Study on Zhongshan City’s Industrial Transition and Upgrading” passed expert review. Dr. Jun Wang, the chair of review panel, hailed the project as a paradigm of NSE theory turned into practice and commented the report as “evidence-based, well-framed and reasoned, with acute understanding of current problems and to-the-point targeted suggestions for future development”. The Executive Deputy Mayor Wenlong Yang noted that the report effectively summarized the successes and disadvantages of the city’s practices in industrial development and provided practical policy advice that will support the government in modernizing the economy of Zhongshan.

Henan Province: Strategic Cooperative Research on Economic Restructuring and Upgrading

On August 28th, 2017 at Peking University, the CNSE domestic think-tank team received Xidong Gao, Executive Vice Mayor of Luohe City, Shaojun Gong, Director of Luohe Municipal Development and Reform Commission, Lemin Zuo, Director of Luohe Municipal Commission for Industry and Information Technology, and officials from the Luohe Government’s Office. The meeting saw discussions on the city’s development and the potential for cooperation on NSE-based industrial upgrading research.

Pingdingshan City: Transformation of A Resource-Dependent City

On October 30th, 2017, Ming Li, Deputy Secretary General and Director of Economic Research Center (ERC) of Pingdingshan Municipal Government, Dahai Dai, Deputy Director of ERC, Xiaohui Yang, Section Chief at ERC, etc, visited the CNSE to discuss the city’s cooperation on the transformation and upgrading research. The two parties examined the status quo of and challenges faced by the city in economic development, and explored the possible paths forward for the economic transformation and sustainable development of a resource-dependent city based on a NSE perspective. After the visit, the CNSE and Pingdingshan Municipality concluded on a strategic agreement on think-tank cooperation for economic transformation and upgrading.
In April 2017, the CNSE signed a partnership with the Overseas Development Institute (ODI), a British think-tank, to jointly undertake the case study project “Supporting Economic Transformation - Survey of Chinese Manufacturing Firms”. The goal of the partnership is to examine the transformation paths that Chinese manufacturing firms may take amid pressures of rising costs, outward foreign direct investment activities, and to advise on the development and going-out strategy of Chinese manufacturing firms.

In May 2017, the CNSE researchers travelled to Ningbo City and Guangzhou City to conduct field investigations into the clothing industry across the Yangtze River Delta and Pearl River Delta. The team interviewed hundreds of local garment firms to understand what devisions they would make when faced with the challenge of rising labor costs. The draft report based on these interviews was completed around mid-June.

Starting in July 2017, the CNSE team launched the second phase of the project, and conducted large-scale surveys to 1,400 foreign trade enterprises under four categories: clothing, footwear, toys and home appliances. Based on the structured questionnaires, cluster-based sampling and strict data verification and cleaning, the survey eventually brought about a dataset consistent of 280 variables and 640 observations. The quantitative research on Chinese firm’s transition and upgrading as well as their going-out strategies and activities based on this dataset were presented at the 12th NSE Academic Team meeting on October 23rd.

The final project report - Adjusting to Rising Costs in Chinese Light Manufacturing: What Opportunities for Developing Countries? - was first published in Peking on December 4th, in Ningbo, on 11th, and in Guangzhou, on 12th. At the three book launch conferences, Dr. Stephen Gelb, Senior Researcher at ODI, Dr. Xiangxiang Zhao, and Jiewei Li introduced the report from different aspects to a wide audience of government officials, industrial leaders, scholars, researchers, representatives from academic institutes, and news agencies.

The project is the first successful cooperation between the Global Research Consortium for Economic Structural Transformation members. It is also the first successful research project result based on in-depth enterprise case study combined with the use of extensive surveying based on industrial cluster sampling. The research findings provide informative descriptions and insights into the transformation, upgrading and going aboard strategy of China’s light manufacturing industry in coastal areas.

The research findings provide informative descriptions and insights into the transformation, upgrading and going aboard strategy of China’s light manufacturing industry in coastal areas.

From June 14-16th, 2016 in Abuja, the capital of Nigeria, Professor Justin Yifu Lin met with the country’s Vice President, Secretary of the President Office, Ministers of Finance, Industry, and Agriculture, and the President of the Central Bank. Prof. Lin signed a partnership with the Nigerian government on a project to facilitate industrialization in order to increase job opportunities, grow exports, and transform the economy.

From May 7-18th, 2017, Dr. Jia Yu led a research team to Nigeria. The research team working with Nigerian Export Processing Authority (NEPZA) officials conducted a field survey of the country’s four existing free trade zones (FTZ) - Kano, Lekki, Ogun, Calabar - and a potential one, Abia. They interviewed over 40 FTZ-based businesses and had extensive conversations with NEPZA officials, Kano Governor, leaders of the Nigeria National Natural Gas Corporation, the Chinese Ambassador to Nigeria, Economic Counselor, and representatives of Chinese-funded companies in Nigeria. These discussions helped the researchers to better understand Nigeria’s economic restructuring process, identify the country’s competitive industries and to evaluate the status quo of FTZ development. A project report was written which offered an accurate diagnosis and targeted advice.
In April 2017, Professor Justin Yifu Lin traveled to Pakistani cities including Istanbul, Lahore, and Karachi at the invitation of Ahsan Iqbal the Federal Minister for Planning, Development and Reform (PDR). During the visit, Professor Lin met with officials from the Ministries of PDR, Finance, and Commerce, and chambers of commerce and shared China’s practice of reform and economic development. Professor Lin also noted the opportunities from which Pakistan could benefit from its cooperation with China.

On May 15th, 2017 at the Belt and Road Forum for International Cooperation, Professor Lin signed a Memorandum of Cooperation (MoC) with Hassan Daud Butt, Director of China-Pakistani Economic Corridor (CPEC) project. The idea of the project was to offer NSE-based advice on investment promotion policies and special economic zone planning in order to support the country’s industrial upgrading and CPEC development. Under the MoC, CNSE would partner with Pakistan to encourage China’s labor-intensive businesses to relocate and invest in Pakistan. The partnership allows for local industrial transformation, job creation, export growth, and ultimately economic expansion for Pakistan.

From May 21st-28th, Dr. Jia Yu traveled to Pakistan for the 2nd Punjab Investment Promotion, where he talked with Shehbaz Sharif, Chief Minister of Punjab, about possible project cooperation. He also held discussions with officials from the Ministry of Planning and Development and Investment Promotion Agency for detailed project plans, visited energy projects financed by the Asian Development Bank, and met with representatives from Chinese-invested businesses in Pakistan. These conversations laid the foundation for the launch of the Pakistan project.
From November 27th to December 11th, 2016, the CNSE team funded by the Africa Development Transformation Research and Investment Program of Bill & Melinda Gates Foundation conducted a two-week field survey in Ethiopia’s capital city Addis Ababa, in an attempt to understand the success stories of Ethiopia’s export-oriented manufacturing industry. The researchers partnered with local businesses, governments, and academic institutes to study the country’s industrial and investment policies and their impact on the textile and footwear industries.

In April 2017 the project was rapidly moving forward as the CNSE started to translate in The Quest for Prosperity authored by Professor Lin into French, analyzed the early stage of industrial cluster development in China, and planned field surveys for the light manufacturing and pharmaceutical industries. In May 2017, the planned field surveys were finalized into including the tie-manufacturing cluster in Chengzhou, Zhejiang Province, Shaxi Garment Production Cluster in Zhongshan, Guangdong Province, Taizhou Pharmaceutical Hi-Tech Industrial Park in Jiangsu Province, and Heze Dezhi International Healthcare Park in Shandong Province.

On June 23rd, researchers traveled to the Shaxi garment cluster to meet with the leaders of the Zhongshan Economy and Trade Bureau, Office of Garment Industry, and Fashion Designers Association and surveyed two clothing manufacturers.

From December 11-17th, Professor Lin and Yong Wang visited the Hawassa Industrial Park for discussions with the Ethiopian Investment Committee, investors, and CMC Group, the developer of the industrial park. On December 23rd at the think tank session of CNSE winter school, Xinyue Wu offered an overview of the report: The Success Factors in the Early Stage of Ethiopia’s Industrialization.

The application of NSE in Poland dates back to October 2015 when the Law and Justice Party won the Polish election with enough votes to govern alone which was an unprecedented victory since the country’s transformation in 1989. The government, led by Morawiecki, announced an NSE-inspired development plan (known as Morawiecki Plan) in February 2016. Using the NSE framework of growth identification and facilitation and classification of five types of industries, Poland identified its competitive industries and bottlenecks of industrial upgrading. Putting the NSE theory into practice, Poland is set to drive economic development through a combination of an efficient market and a facilitating government.

From January 29-31st, 2017 at the invitation of the Polish government, Professor Lin visited Warsaw to have conversations with members of the Council of Economic Advisers to the President and to deliver a keynote speech “Will China Continue to Be the World Economic Engine?” to the International Economic Forum organized by the Polish government. Professor Lin also held a one-hour open discussion with Mateusz Morawiecki, Minister of Finance and Development and Deputy Prime Minister, on the economic landscape of China, Poland, and the world. The hour-long discussion was followed by closed door talks on the practice of NSE in Poland’s economic development.

In October 2017, the book New Structural Economics for Less Advanced Countries co-edited by Professor Lin and Professor Alojzy Z. Nowak, Dean of Warsaw University School of Management, was published in Warsaw. This English-Polish bilingual book has a forward written by Mateusz Morawiecki, where he introduced how NSE was practiced in Poland. The book has been well-received by the academic and business communities in Poland, in which Professor Dariusz Milczarek of the University of Warsaw commented - “a more valuable and meaningful way of rethinking at a time when the traditional development models are declining, if not collapsing”.

Participation in Global Governance

Think Tank Summit: Global Economic Restructuring and Upgrading: China’s Theory, Plans and Opportunities

On May 9th, 2017, in the lead-up to the Belt and Road Forum for International Cooperation, the CNSE and ISSCAD co-hosted at the Peking University Yingjie Exchange Center the think tank summit “Global Economic Restructuring and Upgrading: China’s Theory, Solutions and Opportunities”. The summit brought together over 400 experts and representatives from international organizations, embassies and consulates of B&R countries to China, foreign industrial parks, and Chinese governmental, financial, business, and research organizations.

The summit consisted of two sessions which were dedicated respectively to theory study and practice sharing. The theory session reflected on the development of NSE which included an examination of the theory, practices China contributed to the world’s economic restructuring, identifying opportunities China enjoyed during the transformation, and envisioning a future of close cooperation and joint development between China and the B&R countries. The practice-focused session focused on the sharing of how to draft region-specific policies for boosted inward and outward investment, developing pilots of a new system of open economy, and practicing the Go-Global strategy under the B&R Initiative. At the summit, the CNSE released the first ever New Structural Economics report, Report on Global Economic Restructuring and Upgrading: The Road to New Structural Economics, co-edited by Justin Yifu Lin and Caihui Fu.

Leading from the South: Development Financial Institutions and Green Structural Transformation

In June 2017 in Beijing, the CNSE and the Global Economic Governance Initiative (GEGI) of Boston University’s Global Development Policy Center co-hosted the High-Level Development Bank Symposium. The event brought together a wide range of experts from multilateral financial institutions and development banks, including the Islamic Development Bank, based in Saudi Arabia, New Development Bank founded by BRICS states, Asian Infrastructure Investment Bank, China Development Bank, Development Bank of Southern African and Mexican development bank, Nacional Financiera. The symposium sparked engaging conversations on what development banks can do for environment-friendly and socially inclusive development. The discussions also supported development banks in understanding their role in the transition towards low-carbon economies, identifying challenges countries may face during the process, and making informed policy decisions.

GReCEST Annual Meeting 2017

On May 18th, 2016 at the UN headquarters in New York, the Global Research Consortium on Economic Structural Transformation (GReCEST) was launched by the CNSE with support from the International Food Policy Research Institute (IFPRI) and the African Center for Economic Transformation (ACET). GReCEST has 33 founding members from both developed and developing countries and the Secretariat is housed at the CNSE/INSE. It aspires to foster intellectual partnerships, promotes original thinking and innovative practices in an effort to help developing countries to achieve economic structural transformation and the UN Sustainable Development Goals 2015-2030. The consortium serves as one of the priority areas under the umbrella of the ‘Global Coalition of Southern Think Tank Networks,’ co-convened by the United Nations Development Program (UNDP) and the United Nations Office for South-South Cooperation (UNOSSC).

From December 13-14th, 2017, GReCEST’s second annual meeting was held in Addis Ababa, capital of Ethiopia. The event was organized by CNSE, supported by the Ethiopian Institute for Development Studies and the Institute for International Affairs Policy, and sponsored by the Ford Foundation and the German Agency for International Cooperation. The meeting offered a prominent platform for inspiring discussions on the crucial role of economic restructuring and challenges facing the developing world. The even featured speakers including Professor Yifu, Chair of GReCEST and Director of CNSE, Dr. Célestin Monga, Deputy President and Chief Economist of African Development Bank, HE Arkebe Oqubay, Special Economic Adviser to Ethiopian Prime Minister, and Jorge Chediek, UNOSSC Director and Envoy of the Secretary General on South-South Cooperation.
Under the model of “Small Institute, Big Network”, the CNSE/INSE develops a wide range of partnerships with universities, governmental organizations, and research institutions in China and abroad. The ever-widening network supports NSE’s theoretical research and practices, bolsters the theory’s influence and makes the CNSE/INSE a think-tank with a global vision.
NSE Research Network

The NSE research network is committed to offering an open research platform to support NSE studies, especially for subfields of NSE, through enhanced communications within the network and improved access to external assistance. The research network serves in the following areas:

1. selecting and reviewing NSE working papers;
2. teaching in NSE Summer School/ Winter School;
3. developing CNSE database development;
4. organizing and supporting NSE academic seminars and meetings;
5. evaluating the research funded by NSE Special Fund and providing academic guidance and;
6. providing intellectual support to think tank activities and policy reports.

Partnership with Domestic and International Institutions

On April 13th, 2017, the CNSE signed a memorandum of understanding with the China Association for the Promotion of Development Financing. The purpose of the memorandum was to step up joint efforts in: developing finance theory and case studies; conducting research and policy discussions on cutting-edge and strategic development issues; leveraging resources of financial and business sectors to support the B&R Initiative; developing an economic and financial database that responds to demand; and running external training programs.

On August 3rd, 2017, the CNSE became a member of the Research Centres Networking Group (RCNG), a visiting research program initiated by the Economic Growth Center (EGC) of Nanyang Technological University (NTU) in Singapore. The research program aims to facilitate exchanges between faculty and research fellows across the network, with members including the EGC, Graduate School of Economics of Kobe University in Japan, Asian Development Bank Institute, Asian Growth Research Institute, School of Economics of Hiroshima University in Japan, Arndt Corden Department of Economics of Australia National University, University of Economics in Ho Chi Minh in Vietnam, Graduate School of International Studies of Korea University, and Centre for Research of Private Economy of Zhejiang University in China.

Branch Centers for New Structural Economics

The branches of the CNSE are developed to advance NSE theoretical research and application, to improve NSE programs in universities, and to educate CNSE researchers and practitioners.

In 2017, a number of branches were established in universities nationwide, following the CNSE’s cooperation discussions with a number of local governments, universities, and research institutes.

In April 2017, the CNSE established the Research Center for New Structural Financial Economics (RCNSFE) in partnership with Tsinghua University National Institute of Finance Research. The partnership was an attempt to explore the frontier of new structural financial economics research for academic breakthroughs.

In July 2017, the CNSE Hetian (Xinjiang) workstation was launched. The goal of the workstation is to provide intellectual support for Hetian’s investment promotion, state subsidy program, economic development, and poverty reduction.

In September 2017, the CNSE branch in Tibet University was launched.

In October 2017, the Everest Research Institute of the CNSE Tibet University branch was founded.
The INSE is actively involved in multi-sectoral and multi-level external exchanges to strengthen NSE’s influence in academic and policy communities in China and abroad. These events drive the innovation and advancement of NSE theoretical studies, optimize NSE-related disciplines, help develop NSE researchers and practitioners, and promote the application of NSE research results.
Footprints of Exchanges and Communication
January 2017

January 3rd, Justin Yifu Lin and Yong Wang attended the first High-Level Forum on China's Financial Innovation and Development, where Lin made a keynote speech entitled "New Structural Economics and B&R Initiative", and Wang addressed the forum's NSE session.

January 4-5, Justin Yifu Lin attended the 15th China-US Track II Economic Dialogue in New York City, an event jointly organized by PKU National School of Development (NSD) and the National Committee on US-China Relations.

January 5-8, Justin Yifu Lin, Yong Wang and Xin Wang attended the annual American Economic Association meeting and hosted a faculty recruitment session.

January 11th, Justin Yifu Lin attended the final review of research projects commissioned by the Counselors' Office of the State Council, where the researches he led authored the report - An Analysis of Macroeconomic Landscape and On the Key Issues of the Current Economic Situation - which was graded A.

January 13th, Justin Yifu Lin addressed the Gaidar Forum in Moscow.

January 16th, Justin Yifu Lin attended the 3rd OECD-DAC High-level Commission in Geneva.

January 17th, Justin Yifu Lin attended the 47th World Economic Forum Annual Meeting in Davos and participated in the dinner discussion "Global Economic Prospects: A Turning Point or Great Turbulence" hosted by Atom Think Tank.

January 20th, Justin Yifu Lin attended the Paris roadshow for the 2017 Fortune Global Forum in Guangzhou.

January 21st, Justin Yifu Lin attended the 3rd Advisory Committee Meeting of the African Development Bank in Zurich.

January 29-31st, Justin Yifu Lin visited Warsaw during which he held discussions with members of the Council of Economic Advisers to the President and Mateusz Morawiecki, Deputy Prime Minister, on the economic landscape of China, Poland, and the world, and the practice of NSE in Poland's economic development. He also delivered a keynote speech at the International Economic Forum organized by the Polish government and gave a lecture on NSE and industrial policies for catch-up economies at the University of Warsaw.

February 2017

February 9th, Professor Justin Yifu Lin attended a seminar for individuals with no party affiliations organized by the United Front Work Department (UFWD) of the CPC Central Committee.

February 13-17th, Professor Justin Yifu Lin attended the launch events of his book Going beyond Aid: New Ideas of Development Cooperation in a Multipolar World in Sweden, Norway, Denmark and Finland. In Sweden, he participated in panel discussions with the Swedish International Development Cooperation Agency’s (SIDA) Acting Director-General Lennart Bage and the chief economist team. He held conversations with the director of the Norwegian Agency for Development Cooperation, officials from the Department for Economic Development, Gender and Governance on Africa’s economic development issues, and with Kai Mykkanen, Finland’s Minister for Foreign Trade and Development, on China’s economic development. Professor Lin also addressed the International Symposium on Asian Economies in Finland’s capital Helsinki, which was organized by the UNU World Institute for World Institute for Development Economics Research.

February 18th, Professor Justin Yifu Lin addressed the second PKU forum on the Transformation and Development of Cities with Resource-based Economy with a keynote speech “From Resource Curse to Resource Blessing: A Perspective of New Structural Economics”. The event was organized by PKU National Resource Economics Research Center.

February 21st, Professor Justin Yifu Lin led a team to Guangzhou for field surveys. They held talks with the top officials of the Guangzhou Municipal Government and its economic and trade arms. They also participated in panel discussions with leaders of the Department of Commerce of Guangdong Government and representatives from local textile businesses to understand their current business performance and willingness to go global, and to pinpoint the associated challenges and policy needs.

December 27th, Prof. Justin Yifu Lin attended the Plenary Session of the Economic Committee of the CPPCC. Dr. Jia Yu attended the Symposium on “Current Situation of the World Economy” hosted by the by the International Department of the CPC Central Committee.
Concluding Remarks

The Institute of New Structural Economics at Peking University aims to advance, promote and practice the New Structural Economics and participate in international economic governance. It aspires to be a think tank with global vision that assists local industrial transformation, offering a platform for theoretical researches, policy practices and education and training that sets a new trend of international development economics. The idea is to draw from the development experience of China and other developing countries for theoretical innovation, in order to bridge theory and policy practice. Along with Peking University in its efforts to be a world top-tier university, INSE endeavors to contribute to the great rejuvenation of the Chinese nation, advancement of academic thinking, elevation of soft power, and promotion of knowledge and human well-being.

The PKU Institute of New Structural Economics aims to advance, promote and practice New Structural Economics and to participate in international economic governance. Aspiring to become a think tank with a global vision that serves local industrial transformation, the INSE offers a platform for theoretical research, policy practices, education, and training that sets the trend for international development economics. The purpose of the INSE is to draw upon the development experiences of China and other developing countries for theoretical innovation, bridging theory and policy practice. INSE sets the precedent for theoretical innovation in China’s community of social sciences, which is conducive to PKU’s efforts towards the world’s first-class university and contributes to China’s development and enhanced soft power, international academic studies, and improved social welfare worldwide.

**Propel Theoretical Innovation:** INSE is dedicated to the innovation, enrichment, and widening application of NSE theory and policy framework in order to contribute to the social development worldwide. It also aims to help officials, academics, and students worldwide understand and practice NSE as an alternative to the mainstream development theories of developed countries and instead to find a path to modernization that suits their country’s needs the best.

**Establish NSE Disciplinary System:** The INSE is committed to introducing a structural system into economics, rendering unstructured mainstream theories into (or those structured exclusively on the experience of developed countries) a thing of the past. This is achieved by bringing NSE perspectives, theory, and approaches to the sub-fields of Economics, which fosters a disciplinary system of New Structural Economics. Specifically, the CNSE is developing NSE textbooks, courses, and graduate programs.

**Develop Global High-end Think Tank:** To build a world-leading think tank that sets the trend for international development studies and policy practices, the INSE will initiate a policy consulting system by creating partnerships with international organizations, governments of developing countries, and business sectors to regularly publish flagship think tank reports.

**Cultivate Top-tier Talents:** The INSE supports the programs of the PKU Institute of South-South Cooperation and Development, which was initiated by President Xi Jinping at the 70th Anniversary of the United Nations, by introducing the NSE theories and economic transformation experiences of China and other developing countries to the students. The INSE also offers online courses to engage more young students into learning NSE theories.

**Bridge Theory and Practice:** The notion of INSE is that knowledge without action is not true knowledge and that success in interweaving knowledge with practice justifies true knowledge. New Structural Economics underscores translating practices based on law of development into successful cases, since only when it is effective in practice, can a theory be true and substantially contribute to the development of mankind.

In the years to come, the INSE will continue to regard success in practice as the only benchmark of what true knowledge is. The INSE will continue to work to bridge theory and practice in its academic research and think tank services to support China’s comprehensive reform and economic restructuring. Specifically, the INSE helps local governments to identify economic development bottlenecks and to explore development paths that suit themselves the best, leading to a smoother economic transformation and upgrading process. It also supports the economic take-off of developing countries with packaged services encompassing industrial planning, industrial park planning, and investment promotion. With a focus on China and a global vision, the INSE is committed to the advancement of economic theories and the reform of policy practices.
For a nation to thrive, each citizen shall strive.
Knowing and achieving be one, to be a new code.
